

F&P AIRVO™ 2

AIRVO™ 2 is on the move!

The addition of an Uninterruptible Power Supply (UPS) to the AIRVO™ 2 system opens up a world of possibilities for delivering Nasal High Flow “on the move” throughout hospitals and long-term care facilities.

Continuous power means continuous therapy: during transport between emergency rooms, intensive care units, general care areas and radiology departments, as well as during rehabilitation or diagnostic procedures.

This means that patients can stay on the **same therapy** and **same equipment**, simplifying patient care as well as potentially reducing workload and costs.

Mobile pole stand (900PT421)

- Strong and stable
- Hooks and brackets provide a versatile base for the AIRVO 2 system

UPS mounting kit (900PT411)

- Designed by Fisher & Paykel Healthcare to securely fit UPS's to the 900PT421 mobile pole stand

Accessories basket (900PT426)

- Useful for storing accessories needed “on the go”, such as tube and chamber kits, patient interfaces and water bags

Uninterruptible Power Supply (UPS)

- Not available from Fisher & Paykel Healthcare

Oxygen cylinder holder

- Standard model (900PT427) holds up to two cylinders of 100 - 120 mm diameter (eg. “D” or “M15” cylinders)
