Testing* of the AIRVO Neb adapter demonstrated an emitted dose as high as 39%†

Testing* of the AIRVO Neb adapter demonstrated an emitted dose as high as 39%†

Designed for maximum delivery efficiency.

Built with advanced nebulizer technology in mind.

This kit comes as standard with our AirSpiral™ heated breathing tube technology, which produces up to 93% less condensate than previous AIRVO breathing tubest

When compared with AIRVO tube 900PT501 in internal F&P testing.

If testing was undertaken in co-operation with Aerogen.

‡This result was found using an Optiflow (size medium) cannula at 10 L/min. At 30 L/min and 60 L/min the emitted dose was 37% and 12% respectively.

§When compared with AIRVO tube 900PT501 in internal F&P testing.

Suitable for:
Use with the unique Optiflow™/Optiflow™ Junior interfaces at flows from 2 to 60 L/min.

Better together. The best of AIRVO 2 technology in one kit.

Better together. The best of AIRVO 2 technology in one kit.

In-line nebulizer integration
