

Delivering F&P Optiflow™ + Tracheostomy High Flow Therapy

Introducing F&P Airvo™ 2, delivering respiratory support and airway hydration.

The Airvo 2 is an integrated solution for delivering Optiflow tracheostomy high flow therapy. Fisher & Paykel Healthcare's leading humidification technology allows the Airvo 2 to comfortably provide high flows of humidified air (with supplementary oxygen if required) to spontaneously breathing patients, through the unique Optiflow+ tracheostomy interface.

Optiflow+ tracheostomy interface

- F&P Evaqua™ technology, which reduces the formation of mobile condensate near the patient
- Options for both direct-connect and tracheostomy collar interfaces

Supplementary oxygen (when required)

- FiO₂ 21% to 100%
- Inbuilt ultrasonic oxygen analyzer requires no calibration, service or replacement

Designed for simple setup, use and cleaning

- Helpful onscreen animations assist with setup and troubleshooting

Adjustable flow settings

- Integrated flow generator delivers a wide flow range (10-60 L/min)
- No compressor or wall air supply required

F&P AirSpiral™ heated breathing tube

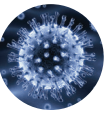

- No external probes, cables or adaptors required

Water vapor and other particles

The F&P Airvo 2 humidifier is designed to generate water vapor (molecules).

Nebulizers and other aerosol delivery systems are designed to generate liquid water particles. Unlike liquid water particles, water vapor is not able to act as a vector for transport of pathogens.

Sizes of particles and pathogens

Pathogens			
Water vapor	Virus	Bacteria	Nebulized water particle
			
< 0.001 Microns	0.02 – 0.3 Microns	0.3 – 10 Microns	1 – 10 Microns

Product codes (*some accessories may not be available in all countries)

PT101xx	Airvo 2 humidifier
900PT561	Airvo 2 AirSpiral tube and chamber kit (10-pack)
*900PT562, 563	Airvo 2 AirSpiral tube and chamber kit with nebulizer adapter (10-pack)
OPT970	Optiflow+ Tracheostomy interface (20-pack)
OPT971	Sputum guard spare part (20-pack)
OPT980	Optiflow+ Mask adapter interface (20-pack)
