

Ventilating the Vulnerable: Interface Choices in Neonatal Resuscitation

Wednesday, December 17, 2025

MORNING: 9 am PST / 11 am CST / 12 pm EST

AFTERNOON: 1 pm PST / 3 pm CST / 4 pm EST (recorded)

1.0 CRCE CREDIT (RTS), 1.00 CERP (RNS)

Dr. Anup Katheria
MD

Strengthen your knowledge of neonatal resuscitation interfaces in our upcoming EIA webinar. Led by neonatal care expert Dr. Anup Katheria, MD, the session will examine:

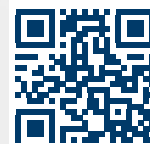

- Current guidelines for neonatal resuscitation interface selection
- The advantages and limitations of commonly used interfaces
- Implementation challenges and considerations in clinical practice
- Evidence gaps and opportunities for future research

Dr. Katheria has extensive experience in neonatal resuscitation, with much of his research focused on delivery room interventions, including umbilical cord management, intact cord resuscitation, and less-invasive surfactant administration.

He is currently the Director of the Neonatal Research Institute and the NICU follow-up clinic at Sharp Mary Birch Hospital. He also teaches POCUS and Echocardiography as an adjunct Associate Professor of Pediatrics at UCSD.

Morning session

Afternoon session
