

Simply CapFit™

## Just like putting on a cap

Unlike any other mask, F&P Evora™ incorporates CapFit headgear that has been designed to be put on like a cap - a simple and intuitive movement that patients are familiar with.

The headgear structure ensures the seal is presented in the right place every time, making life easier for you and your patients.

Found Evora  
simple to fit.<sup>1</sup>

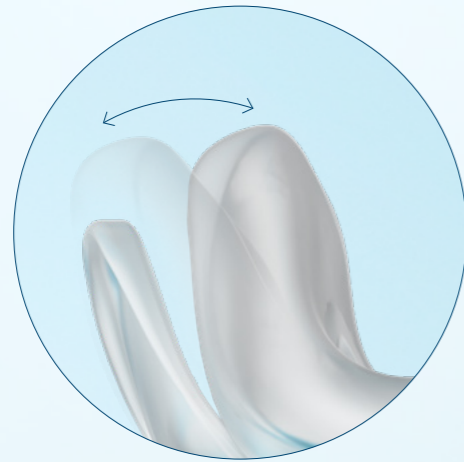

Found Evora simple to  
take off and put on  
in the dark.<sup>2</sup>

## The next generation of Dynamic Support

The stability wings work in synergy with the floating seal to allow freedom of movement while keeping the mask comfortably in place.

### Floating seal

Engages to wrap around the nose, providing a flexible and comfortable seal.

### Stability wings

Designed to keep the floating seal in place throughout the night.

# Supporting your business efficiency

Clinical research shows complexity in mask design<sup>3</sup>, poor mask fit, and discomfort<sup>4</sup> can lead to more time spent with patients and ultimately non-adherence.<sup>4</sup>

When choosing a new mask consider how your choice can impact the amount of time you spend on:

- Fitting
- Educating
- Cleaning
- Ongoing support and motivation
- Resolving mask problems
- Subsequent mask setups

**CapFit headgear**  
Minimal, one-size headgear for a simple and intuitive fit.

**Soft-knit fabric**  
Comfortable headgear designed with AirEdge Technology to avoid leaving marks on the face.

**Compact nasal seal**  
Soft floating seal that sits comfortably under the nose to create an unobtrusive seal.

**Radial air-flow**  
Laser-drilled exhaust holes designed to minimize noise and draft.
