

INDEPENDENT ASSURANCE STATEMENT

Toitū carbonreduce certification

TO THE DIRECTORS OF THE TOITŪ ENVIROCARE BOARD

Responsible Party:	Fisher & Paykel Healthcare Corporation Limited
Registered address:	15 Maurice Paykel Place, East Tamaki, Auckland, 1061, New Zealand
Inventory period:	01/04/2020 - 31/03/2021
Inventory report:	IMR_2021_FandP_CR.docx
Contract:	Fisher & Paykel Healthcare Limited, 31/03/2017

We have reviewed the greenhouse gas emissions inventory report (“the inventory report”) for the above named Responsible Party for the stated inventory period.

BOARD OF DIRECTORS’ RESPONSIBILITIES (RESPONSIBLE PARTY)

The Board of Directors of the Responsible Party is responsible for the preparation of an inventory report which gives a true and fair view of the greenhouse gas emissions of the Responsible Party in accordance with ISO 14064-1:2006 and the requirements of the Enviro-Mark Solutions Limited (trading as Toitū Envirocare) Toitū carbonreduce programme.

VERIFIERS’ RESPONSIBILITIES

It is our responsibility to express to you an independent opinion on the inventory report presented by the Board of Directors of the Responsible Party. Our verification was undertaken as agreed in the Contract which defines the scope, objectives, criteria and level of assurance of the verification.

BASIS OF OPINION

The subject matter contained in the inventory report is based on historical information for the stated inventory period. Our review was carried out in accordance with the criteria stated in ISO 14064-1:2006 and the Toitū carbonreduce programme.

The verification included examination, on a test basis, of the evidence relevant to the information and data disclosed in the inventory report. It also included assessment of the assumptions and judgements made by the Responsible Party in the preparation of the inventory report.

We conducted our verification in accordance with ISO 14064-3:2006 and the requirements of the Toitū carbonreduce Verifier Manual. We planned and performed our verification so as to obtain all the information and explanations which we considered necessary in order to provide us with sufficient evidence to obtain the specified level of assurance that the inventory report is free from material misstatements, whether caused by error. In forming our opinion we also evaluated the overall adequacy of the presentation of information and data in the inventory report.

Other than in our capacity as an independent verifier of the emissions inventory we have no relationship with or interests in the Responsible Party.

RESPONSIBLE PARTY’S GREENHOUSE GAS ASSERTION (CERTIFICATION CLAIM)

Fisher & Paykel Healthcare Corporation Limited meets the requirements of Toitū carbonreduce certification having measured its greenhouse gas emissions in accordance with ISO 14064-1:2006 and committed to managing and reducing its emissions in respect of the operational emissions of its organisation.

OPINION REASONABLE ASSURANCE

We have obtained all the information and explanations we have required. In our qualified reasonable assurance opinion, the Scope 1, 2, and all reported Scope 3 emissions defined in the inventory report:

- comply with ISO 14064-1:2006 and the requirements of the Toitū Envirocare Toitū carbonreduce programme; and
- provide a true and fair view of the emissions inventory of the Responsible Party for the stated inventory period.

QUALIFICATIONS

Scope 3 Additional (use of solid products):

The emissions reported as Validation in Category 5 were Electricity consumption for the use of solid products (medical devices). This was estimated using sales data and an electricity use profile per product using assumptions on active phase and standby phase electricity use and intended life of the product as provided by FPC engineers. This electricity consumption for each type of product sold per country was then multiplied by a country or regional electricity emissions factor (depending on emissions factor availability). For the products reported, electricity consumption in the active phase made up 85-100% of the total estimated electricity consumption. The Category 5 inventory estimates are therefore sensitive to changes in this assumption. Assumptions have been assessed and deemed reasonable.

Scope 3 Additional (Employee commuting for New Zealand) is based on assumptions around mode of transport for each employee (based on an employee survey)
