

Redefining Comfort.

Redefining Comfort.

Comfort is unique. Comfort is personal. Comfort is key to successful CPAP therapy. That's why we believe comfort needs to be measured across a full night's sleep, not just during the initial consultation.

With technologies that work together to provide stability, adaptability and breathability throughout the night, F&P Vitera is a mask that redefines comfort.

Stable and secure with dynamic stability.

The stability bar and the RollFit™ XT seal provide dynamic stability to keep the seal comfortable and secure during the night.

Freedom to move with RollFit XT.

- Dynamically adapts as patients move, helping to keep the seal in place throughout the night
- Soft silicone seal rolls back and forth, minimising pressure on the nose
- Designed to fit a wide range of face and nose shapes
- Seal shape designed to minimise leak into the eyes

88%

of patients could sleep
in their preferred sleep
position throughout
the night²

Keep cool and comfortable with VentiCool.

Sweating during sleep is a well-known symptom of patients with OSA.⁴

Vitera headgear features proprietary breathable fabric that allows more air and moisture to escape than the material used in our leading range of full-face masks.*

VentiCool technology helps to keep patients cool and comfortable during sleep.

90%

of patients rated the Vitera as equally or more comfortable on the face compared to their usual mask³

* Internal testing shows the headgear with VentiCool technology allows 21 times more air-flow and 32% more moisture transfer than the headgear used in our leading full-face masks.⁵

Key features and benefits

RollFit XT Seal

Dynamically adapts to minimise leaks and pressure on the bridge of the nose

VentiCool™ Technology

Breathable headgear designed to allow heat and moisture to dissipate

Ease-of-use Features:

- Adjustable headgear and clips
- Removable forehead clip
- VisiBlue™ colour cues

Stability Bar

Designed to keep the seal in place during the night

Fitting guide

Step 1.

Hold the front of the mask with one hand and the headgear with the other. Ensure that one headgear clip is unhooked from the frame.

Step 2.

Place the seal onto your face and guide the headgear over your head.

Step 3.

Hook the unattached headgear clip onto the frame.

Step 4.

Gently tighten the headgear straps starting with the bottom straps, followed by loosely fitting the blue forehead straps.
