

## Introducing the RT302 MicroCell™ Circuit and Optiflow™ + Nasal Cannula Kit

The RT302 MicroCell Circuit and Optiflow+ Nasal Cannula Kit is an all-inclusive solution for delivering Optiflow Nasal High Flow therapy.

Reduces condensate by up to **30%** when compared with a conventional circuit<sup>1</sup>

Less condensate may reduce interruptions to therapy due to "rain-out"

Comfort and confidence<sup>2</sup>

→ The RT302 Kit contains a Heated Inspiratory Adult Breathing Circuit made of a non-permeable material with Fisher & Paykel Healthcare's unique MicroCell technology.

→ The MicroCell wall structure forms an insulation shield between the cool air outside and the water vapor inside, locking in humidity and reducing condensation.<sup>1</sup>

→ With its unique concave base, together with soft contoured prongs and cheek pads, and a customizable headstrap, the Optiflow+ Nasal Cannula provides patient comfort and stability on the face.<sup>2</sup>

**MicroCell Inspiratory Circuit**

**Conventional Breathing Circuit**
