F&P SIMPLUS FULL FACE MASK

When engineering the F&P Simplus our designers set out to create a mask that revolutionized Full Face comfort, seal and easy use.

The F&P Simplus is the result of intensive research and development, many prototypes and thousands of design hours. We consulted patients, equipment providers and clinicians from around the world to develop a mask that simply fits + performs.
The F&P Simplus incorporates three key components, the RollFit™ Seal, ErgoForm™ Headgear and Easy Frame, all designed to work in harmony. In combination, these components offer the comfort, seal and easy use that Fisher & Paykel Healthcare masks are known for.

1. RollFit Seal
   As the name suggests, the one-piece seal “rolls” back and forth on the bridge of the nose to adjust automatically. In doing so, the RollFit Technology reduces pressure on the bridge of the nose. The RollFit Seal incorporates Integrated Stability Panels to enhance the sealing performance and the Advanced Air Diffuser is designed for minimal noise and draft.

2. ErgoForm Headgear
   This breathable, ergonomically designed headgear self-locates high on the rear of the head, allowing for unrestricted head movement (sideways, up and down). Incorporating Stretch and Non-stretch Panels, the ErgoForm Headgear is designed to hold its shape and allow stretch where it is required, for optimal usability and performance. Embedded VELCRO® Tabs with Easy-Clip Hooks enable fast fitting and removal. The Adjustable Crown Strap enhances mask stability.

3. Easy Frame
   This low-profile frame is stable, durable and small, and ensures a clear line of sight. The one frame fits all three seal sizes and has an Easy-Clip Frame Attachment to aid assembly after cleaning. The Ball-and-Socket Elbow rotates for freedom of movement while reducing drag from the CPAP tube.
